Reimbursements

The Half Pipe schedule is used to determine the front footage reimbursement to former developers for infrastructure previously installed along the front footage of the development.

The Full Pipe schedule is used to determine the oversizing reimbursement to the developer for installing water, sewer, and storm main extensions to sizes required by each master plan that are greater than the sizes required by the development. The oversized portion is the difference between the master planned size for the main and greater of the main size required by the development or the developer's minimum responsibility for each main.
