DESCRIPTION

- 7a. Architectural style: Craftsman Bungalow
- 7b. Briefly describe the present *physical appearance* of the site or structure and describe any major alterations from its original condition:

This one story structure is of rectangular form, sheathed in stucco, with wood trim. The low pitched gabled roof with wide, unenclosed eaves overhangs decorative beams and braces. The porch set to one side, has a projecting low gable roof line. Windows on the front are in pattern with mullion divisions or have been replaced. Porch supports are squared and continue to the ground line. Built simply to accommodate working people, the economy of simple design is visible in the entire group. However, individual design elements enhance this early Craftsman development.

SIGNIFICANCE

19. Briefly state historical and/or architectural importance (include dates, events, and persons associated with the site.)

The varied bungalow styles were readily accepted and adopted into the Gilroy home collection for their many attributes. A pleasant home that featured overhanging eaves providing protection from the summer sun was an important consideration since most were first occupied in the summer months. Recessed porches allowed a place to sit and watch neighborhood activities from a protected vantage point. Ornament and detailing was straight forward reflecting the style of the structure itself. Well suited to the needs of a growing population, the significance to this survey is in the number of homes and variety of styles that remain relatively in their original condition. These create streetscapes that are important because of the unity of the whole more than the special qualities of any individual structure.
