DESCRIPTION

- 7a. Architectural style: Craftsman
- 7b. Briefly describe the present *physical appearance* of the site or structure and describe any major alterations from its original condition:

This one and a half story craftsman has a hipped roof with a large gable projecting toward Eigleberry Street. Many of the features of this house are exceptionally well done, including the use of shingles in the gable and the variation in the siding on the other walls from narrow to wide clapboard. The exposed rafters and support brackets are common characteristics of the craftsman style but the superbly finished brackets on this house are really outstanding in their variety and location as they have been used in the gable and also in the porch. Square groups of pillars support the recessed porch which is located just to the left of a very nice bay window. All the windows on the front of the house, including the one in the gable, are decorated with rows of small panes above the regular sized glass.
